MINI CAMOUFLAGE

No need to hide – not even a little

MINIcamouflage is for people brave enough to stand out from the crowd. It makes a clear statement that you don't hide away in your shell – and that you dare to go against the flow and rebel against tradition. This busk+hertzog design helps you show your true colours.

MINIcamouflage has a three-dimensional effect, because each MINIcamouflage shape can be mounted at three different distances from the wall. This means it's up to you to choose the combination of shapes, where they are placed, and their height from the chosen surface.

Available in packs with either one or three MINIcamouflage shapes in white, plum, black, green, lime, dark grey as well as brushed or polished chrome.

busk+hertzog

MINIcamouflage is the work of the prize-winning Danish design duo busk+hertzog. Designs by Flemming Busk and Stephan B. Hertzog are characterised by pure, uncluttered lines and a simple, direct idiom. Believing that anything decorative should also have a function, busk+hertzog elegantly combines practicality with exclusive design.

Since the company was founded in 2000, busk+hertzog designs have won countless awards both in Denmark and abroad. They can be seen all over the world – everywhere from major international airports to the players' lounge of Chelsea Football Club. Several busk+hertzog designs are on permanent display at the Danish Museum of Art and Design, and 18 of their chairs were included at the reopening of the Museum of Modern Art in New York in 2004.
