

FROSTLINE®

FROSTLINE A/S is a Danish company that designs and manufactures outdoor water taps in glass peened stainless steel. The FROSTLINE® product range includes water taps for installation in private gardens, public parks and facilities as well as construction sites and washing-down areas. The water taps are robust with a classical design.

The products are unique because they ensure frost-proof water supply and fresh, cool water all year round.

FROST PROOF
Outdoor
Water Taps

The core of the product range is the patented self-emptying 3-way sliding valve. When the water tap is not in use, the valve and riser pipe are emptied of water that might otherwise freeze. The water tap and thus the valve and riser pipe are frost-proof as long as the water supply line for the tap is at frost-free depth.

FROSTLINE®

CLASSIC WATER TAP

CLASSIC 23 G WATER TAP

½" frost-proof water tap, especially designed for private gardens. Made from glass peened stainless steel. The beautiful and classic water taps from FROSTLINE® are a stylish addition to any garden, patio, courtyard and anywhere else with a need for fresh outdoor water. The water tap is supplied complete with well.

The water tap is fitted with a self-emptying 3-way sliding valve ensuring that the tap remains frost-proof, even at hard freezing temperatures. The seals can be replaced without digging up the well. Pull the water tap up of the well, dismantle the valve and change the seals (o-rings).

Is the product to be placed in an area with a high environmental impact, including sea fog, it is recommended to choose a special design i.e. an electro polished surface.

PRODUCT

Designation: ½" frost-proof water tap for outdoor installation
Tapping: ½" nipple pipe thread
Connection: ½" nipple pipe thread

INSTALLATION DIMENSIONS

Tapping height: 430 mm
Tapping depth: 225 mm
Pipe stand height: 795 mm
Height of handle: 715 mm
Height of spout: 630 mm

PRODUCT DIMENSIONS

Overall height: 1,695 mm
Overall width: 200 mm
Well: D200 x 900 mm

SHIPPING

Dimensions, H-W-D: 1,740 x 200 x 380 mm
Weight: 10.5 kg complete with well

VALVE

FROSTLINE® self-emptying sliding valve
Capacity: 18-23 l/min. at 2-4 bar
O-rings: 1 x D14 x 1,5 70sh, 2 x D10x2,5 70sh

MODELS		
F004	74.34.80.004	Classic Water Tap
OPTIONAL		
F512	74.34.80.916	Classic Well Ring D60
F530	74.34.89.916	Quick coupling - stainless steel

FROSTLINE®

DUO H 30 WATER TAP

DUO H 30 WATER TAP

½" frost-proof water tap made from glass peened stainless steel. This water tap is particularly suitable for public parks and facilities, golf courses, camping sites and other areas with a need for reliable water supply all year round. The water tap is supplied complete with well.

The water tap is fitted with a self-emptying 3-way sliding valve, ensuring that the tap remains frost-proof, even at hard-freezing temperatures. The seals can be replaced without digging up the well. Unscrew the spindle housing from the top of the pipe stand, then pull up the spindle and replace the O-rings.

If the product is to be placed in an area with a high environmental impact, including sea fog, it is recommended to choose a special design i.e. an electro polished surface.

PRODUCT

Designation: ½" frost-proof water tap for outdoor installation
 Tapping: ½" nipple pipe thread
 Connection: ¾" nipple pipe thread

INSTALLATION DIMENSIONS

Tapping height: 760 mm
 Tapping depth: 155 mm
 Pipe stand height: 900 mm
 Height of handle: 795 mm
 Height of spout: 900 mm

PRODUCT DIMENSIONS

Overall height: 1,820 mm
 Overall width: 166 mm
 Well: D160 x 900 mm

SHIPPING

Dimensions, H-W-D: 1,840 x 200 x 300 mm
 Weight: 10.5 kg complete with well

VALVE

FROSTLINE® self-emptying sliding valve
 Capacity: 28-32 l/min. at 2-4 bar
 O-rings: 8 x 3 mm NBR – shore 70

VA approval No.: ETA – VA 1.51/16921

OPERATION OF THE VALVE

The water tap is provided with a 3-way self-emptying sliding valve. When the water tap is not in use, the valve and riser pipe are emptied of water that might otherwise freeze. The water tap and thus the valve and riser pipe are frost-proof as long as the water supply line for the tap does not freeze.

DRINKING FOUNTAIN
OUTDOOR

DRINKING FOUNTAIN - OUTDOOR

Outdoor drinking fountain made from glass peened stainless steel. The drinking fountain is intended for kindergartens, school yards, parks and at sport facilities where there is a need for fresh, cool water all year round. The fountain is robust and reliable and therefore suitable for installation in the public area.

The design is without any sharp edges and protrusions where children might hurt themselves.

There are no operating costs in connection with the use of the fountain. The fountain is provided with a self-closing handle that turns off the water when released. The fountain is fitted with a self-emptying 3-way sliding valve, and when connected to the main water supply, the fountain will provide cool water all year round. A fascine of 500 mm is recommended.

Is the product to be placed in an area with a high environmental impact, including sea fog, it is recommended to choose a special design i.e. an electro polished surface.

PRODUCT

Designation: Drinking fountain, Low 600 mm and High 805 mm, supplied complete with installation and drain well
