Oak	100801
Ash	100800
Black oak	100802

Technical Drawing

Installation

Installation must be carried out only on a prepared, flat surface by a qualified professional.

Select and position the brush holder in the desired location. Measure and mark the positions for the mounting holes.

- Choose mounting screws and any necessary wall plugs according to the wall material.
- Screw the upper mounting screws close to the wall to secure the container firmly.
- Finally, tighten the lower screws at the bottom of the container with a screwdriver to lock the container to the wall.

Maintenance

Clean regularly using water and mild cleaning agents. Chlorine-based or abrasive cleaners or tools are not suitable for cleaning.

The Kaldo brush heads and handle are replaceable. You can conveniently purchase new replacement heads and handles from Wuoma's online store at www.wuoma.com if needed.

Recycling

The product is made of wood or wood veneer. Recycling the products is easy. Wooden waste can be converted into energy by separating it from the metal backplate. The metal parts must be recycled at appropriate waste treatment facilities where the metal is melted and reused. The plastic parts of the brush can be recycled through plastic recycling points.

General Commissioning Instructions

- Ensure that the packaging and its contents have not been damaged.
- Make sure you have received all the products you ordered. Always store and transport the product in its original packaging.
- The product is approved only for its intended use. Failure to follow these instructions voids the warranty and releases the manufacturer from liability.
- The product warranty is 24 months from the date of purchase. For more information about the product, please contact us: info@wuoma.com
