## EQI WALL VALVE

Embellish your facade with the frost-free and timeless Frostline wall from the EQI series, ensuring water for tasks such as car washing and gardening. Upgrade your home and transform a practical measure into an aesthetic source of quality of life. The frost-free faucet comes with a matching hose saddle, providing an elegant storage solution for your garden hose. The fixture is handcrafted in Denmark and made of durable materials, ensuring a solution that you can enjoy for many years.

# EQI WALL VALVE

Frostline, crafted in Denmark for over 30 years, presents a diverse collection of frost-free outdoor products renowned for their elegant design, superior quality, and functionality.

Wall operates by using a self-draining mechanical valve to empty the post valve of water after use, ensuring fresh water year-round. Our products do not require electricity to ensure frost-free operation and are made of stainless steel - environmentally friendly in every way. The water hydrant is a lever, providing simple operation and great comfort.

## Installation

If connection with a ½" is desired, the copper pipe is cut completely down.

Glassblown

Copper

Brass

The matching EQI hose holder is available for EQI Wall valve.

## IMPORTANT

**Wall mounting:** For frost-proof function and guarantee, there is a requirement for a frost-free water supply year-round and that the product has a slope of at least 2-3% towards the outer wall. Additionally, a product in standard measurements should be used. Note: At temperatures below 5 degrees Celsius, hose fittings or other equipment that reduces clearance must not be installed.

## Specifications

### Product dimensions

Hose connection	½"
Connection	15 mm or ½"
Backplate H-W	105 x 60 mm
Forkant til facade	90-130 mm

### Packaging

Dimensions H-W-D	700 x 45 x 80 mm
Weight	1,3 kg

### Frostline valve

Capacity	23 l/min.
O-rings	Service set 9010

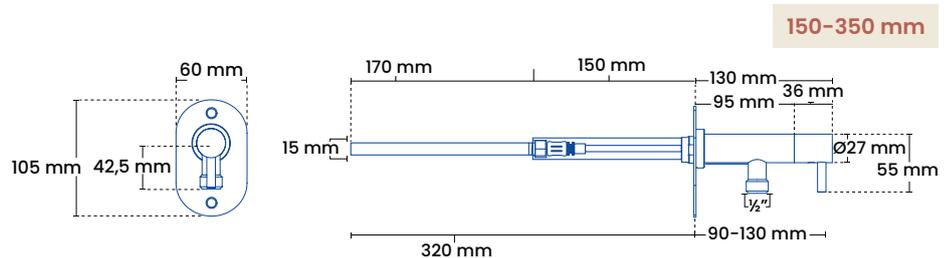

### Variants

Product	VVS no.	Description
